Summary of Request for Funding:

Executive Summary

It is best to write this summary after you have completed all the other sections of this business plan. It should be at least 225 words or about $\frac{3}{4}$ of a page double spaced, but no more than 2 full pages. Think of it as three to five minutes to tell a complete stranger what the core of your business is and the products or services you provide. Please include your product description or services provided. Who are your customers? How are your products/services beneficial to customers and how will you communicate your business to those customers?

**Description of the Products/Services Provided by
Or to Be Provided by the Business**

Describe the product or service that you will provide in your business. Are there drawings, photos or renderings of your products or services that would be helpful for the committee in assessing your loan request? Please describe your pricing structure, fees and any other revenue potential that you foresee in the future. What do you see as the benefits to buyers/clients who request to use your services or purchase your products? How do your services and/or products compare to what is already available in the current market?

Describe How You Currently Market Your Business

Describe How You Currently Market Your Business or Plan to Market Your Business

Describe your current market as to size, location and how you plan to break into the present market. Who are your competitors, how do they function and where are they located? What makes your competitors successful? What is your unique selling plan that will allow you to win business from the competition? Who are your consumers and how do you plan to market to this potential end user of the product or service? Add any additional information you feel important to your marketing efforts?

Describe How the Business Currently Operates or Will Operate

What type of business entity do you operate or will operate under (identify one by checking the box):

- Sole Proprietorship
- Partnership
- Limited Liability Partnership
- Limited Liability Company
- S Corporation
- C Corporation
- Professional Service Corporation

Are their specific licenses or permits required for your business and have you obtained the appropriate documentation? How do or how will you collect revenue? Will there be credit terms and if so how will you administer those terms? Do you have the process in place to collect and remit sales tax? What people do you currently have on staff or plan to staff if it is a new start up? What processes are in place to successfully operate the business? What location do you operate from or plan to operate from? What if anything is needed to be done to begin operation of your business or grow the operation of your business?

Financial Plan

The financial plan can take any format; we might suggest an Excel spreadsheet to provide at a minimum a prior two years of revenue and expenses for an ongoing business and projects for the coming year. For a new business, we would ask you estimate, based on your overall assessment of the business, your projected total revenue for a three year period. Please show all your expenses associated with that business to give some perspective of the potential for a breakeven point for the same period as above. It is critical source of information for the committee so please think through this process carefully.
